ABOUT

I'm a Software Developer based in Buenos Aires, Argentina, with a strong focus on Frontend and deep passion for motion design.

With a keen eye for detail and penchant for innovation, I'm dedicated to creating meaningful and memorable user experiences.

My work goes beyond just building websites—I'm driven by a relentless pursuit of creativity, combining micro-animations and intuitive design to create engaging digital solutions.

TECHNICAL PROFICIENCIES

React Js	React Native	Three Js
Next Js	CSS | Sass	Figma
Javascript	Framer Motion	Git
Typescript	Gsap	Postman

PROFESSIONAL EXPERIENCE

Feb 2023 - Present

DELSUD, ARGENTINA
Software Engineer

As a Software Engineer at Delsud, I'm part of a multidisciplinary team, developing and delivering tailored software solutions for our diverse range of clients.

- **Development and optimization**: implementation and maintenance of customized web tools and systems, creating dynamic and engaging interfaces tailored to each client's needs.

- **Keen eye of detail**: crafting interactive and responsive websites that incorporate microanimations, elevating user experience through smooth navigation.

- **Solid code**: code generation following Clean Code principles to ensure easily maintainable and scalable solutions over time.

- **Team work**: active collaboration with cross-functional teams, to deliver high-quality solutions, prioritizing efficiency and efective communication.

PROFESSIONAL EXPERIENCE

Apr 2023 -
Apr 2024

VEAN BOOKS, ARGENTINA
Frontend Developer

I collaborated with the development team to create a product that showcases the startup's potential and vision.
The goal was to demonstrate how a solution to the identified shortcomings of the publishing industry model, could be implementend in the future, expanding the reach of books and improving the profit distribution, making it more equitable for all participants in the process.

- **MVP development**: e-commerce developing as a preliminary version of the product, showcasing the project's capabilities.

- **User-oriented**: design focus on providing the best user experience, while also ensuring the creation of a visually appealing interface.

- **Collaborative synergy:** working closely with the design team to ensure consistency between design and development.

BLUERABBIT, ARGENTINA
Frontend Mobile Developer

At Bluerabbit, I contributed to the development of new features for the company's mobile application, available on Play Store and App Store.
My work focused on implementing functionality that increase user retention and their interaction in the app.

- **Google Maps API integration**: incorporating geolocation into the app, making it easier for users to access relevant nearby locations.

- **Rewards system**: development of a points-based rewards system, allowing users to obtain a lot of benefits. This system encouraged greater participation, significantly contributing to increased the app engagement.

Sep 2022 -

LINTEGRAL, MÉXICO
Full Stack Developer

At Lintegral, I focused on automating one company's manual process, in response to its fast growth.

- **Full System Implementation:** Frontend, Backend and database creation, differentiating views between "client" and "administrator" role.

- **Survey system**: creation of a form that could be completed only once per user. Responses were collected in percentage and numeric scales to identify user satisfaction.

- **Data storage and visualization**: graphical representation of results, allowing administrators to interpret values more easily and quickly.
